

We confirm that we have concluded an insurance policy for freight forwarder's and carrier's liability. The insurance covers the liability of the insured for damage caused to another stipulated by the legislation of the Czech Republic and the relevant multilateral agreements for the international transport of consignments on the basis of a forwarding or transport contract. The insurance covers damage incurred during transport performed by road motor vehicles specified in the insurance contract.

The detailed conditions of the insurance (including exclusions and other insurance coverage restrictions) are defined in the insurance policy and the applicable insurance terms and conditions.
